

PhiLings Basic Course ONLINE – Information

Our PhiLings Palette consists of two anti-ageing, rejuvenating and bio-regenerative complementary and equally important treatments that can be used in combination or separately - Microneedling and Phi-Ion. In our PhiLings trainings, we deal with both of these to the same extent and we train you to be able to properly combine and use them professionally.

We provide our students with:

- continuous support through our Craft Master application for online studying 3 months
- plenty of video materials with detailed instructions on how to perform the treatments
- tips and tricks for the best combination of treatments
- tips on how to make good photos
- one of the best kits in the industry that will allow you to make more money than you invested in our course containing the following (cosmetics for 20 treatments):
 - Phi Ion Pen + 20 sterile electrodes
 - Simplicity Artist Microneedling Pen + 20 sterile needle modules
 - Universal Phi Holder + 10 round 5 sterile needles + 10 round 3 sterile needles
 - Phi wipes 20
 - Microneedling solution Tango 10 blister mono doses
 - Microneedling solution Jive 10 blister mono doses
 - Skin Candy After Care Balm 9 pcs
 - Ultimate skin cocktails 20 mono doses
 - After treatment Phi Mask 20
 - Cosmetic Pencil 1

COURSE OUTLINE

The course covers the following topics to make sure the students get the right skills and confidence to perform the treatments:

- Theory on skin structure and characteristics of specific facial skin areas
- Determining different skin types
- Recognising characteristic skin conditions
- Assessing the clients' eligibility to undergo the treatment
- Hygiene and sterility
- Familiarisation with tools and devices used for the treatment and their working principles
- Tools maintenance
- Familiarisation and practice with different operating modes of the tools
- Application techniques – Microneedling:
 - Operating modes (puncture depth and frequency) in treatment of different facial areas and areas to be avoided
 - Proper use of Microneedling solution
 - Direction and number of passes
 - Determining when the treatment is over
- Application techniques – Phi-Ion
 - Precise anatomy of the eye region
 - Determining wrinkles and bend lines stage and selection of areas to be treated
 - Operating modes (energy intensity and electro diameter)
 - Distance between two consecutive micro contact points and forming the treatment line
 - Proper positioning of treatment area and the device
 - Connecting the points into tarsal lines and forming tarsal bands by arranging the lines properly
 - Forming uplifting lines and bands
 - Treating wrinkles outside the eye region
- Expected results – Microneedling
- Expected results – Phi-Ion
- Aftercare – Microneedling
- Aftercare – Phi-Ion

In order to obtain PhiLings Artist Certificate, the students are required the specified number of levels in Craft Master application which test the following:

- ability to determine skin type
- ability to choose the appropriate treatment
- ability to conduct the treatment properly
- at least 10 successful treatments (5 Microneedling treatments + 5 Philon ptreatments) documented with photos (before/during the treatment/immediately after the treatment/final result)
